PROJECTS

Tiffin service management service

Java Jakarta EE HTML5 CSS3 JavaScript MySQL Apache Tomcat JDBC

A full-stack web application for managing a daily tiffin (home-cooked meal) delivery business. The system has two portals — an Admin Panel and a User Dashboard. Admin can add menu items with food photos, manage daily menu, view all customer orders, and accept or decline orders in real time. Users can register, login, browse the live menu with photos, place orders with delivery address, and track their order status (Pending, Accepted, Declined) live on their dashboard. Built using Java Servlets on Apache Tomcat with MySQL database.
